Sprint 89 (06.04.2020 - 19.04.2020)

## QA Team

- QA Lead  
Nick Z.
- QA Engineer  
Aleh V.
- Automation QA Engineer  
-

Jira

**Types of testing used**

- Functional testing;
- Smoke and Regression testing;
- Cross browser testing;
- Localization testing;
- Automated testing (UI / Integration);
- Usability testing

**Tasks tested:**

- 28

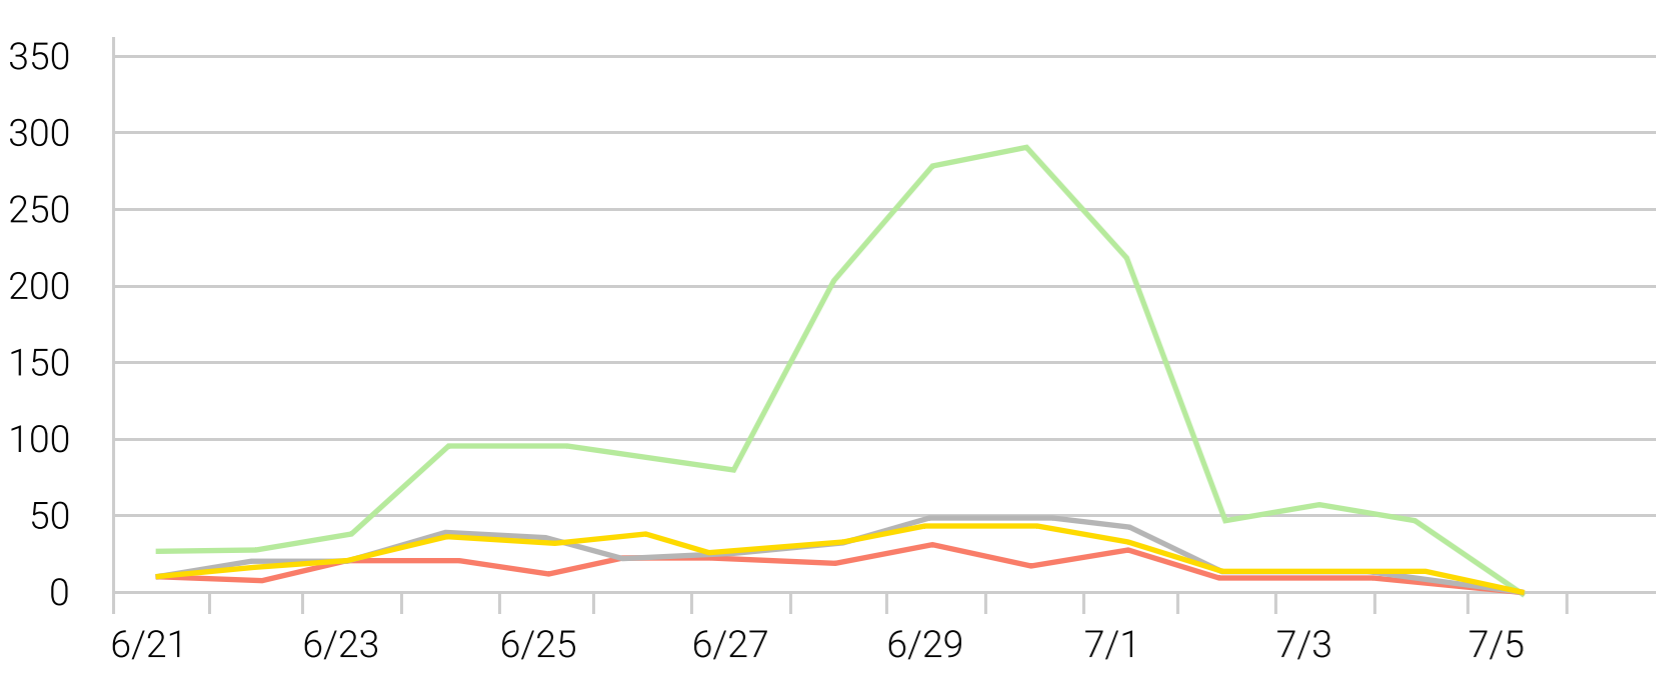

**Defects found:**

- 40

**Test cases created:**

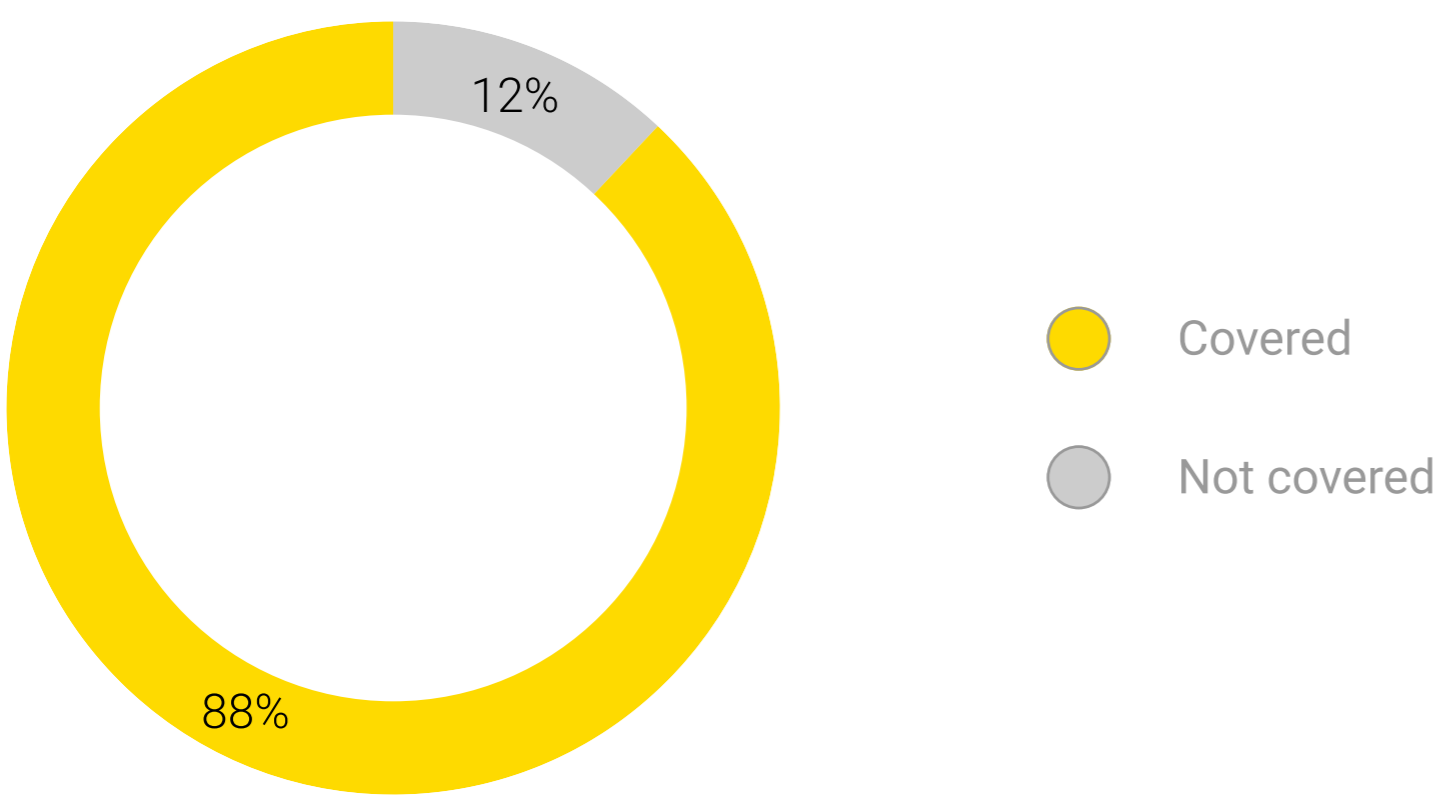

- 142

## Test case Report Execution (TestRail)

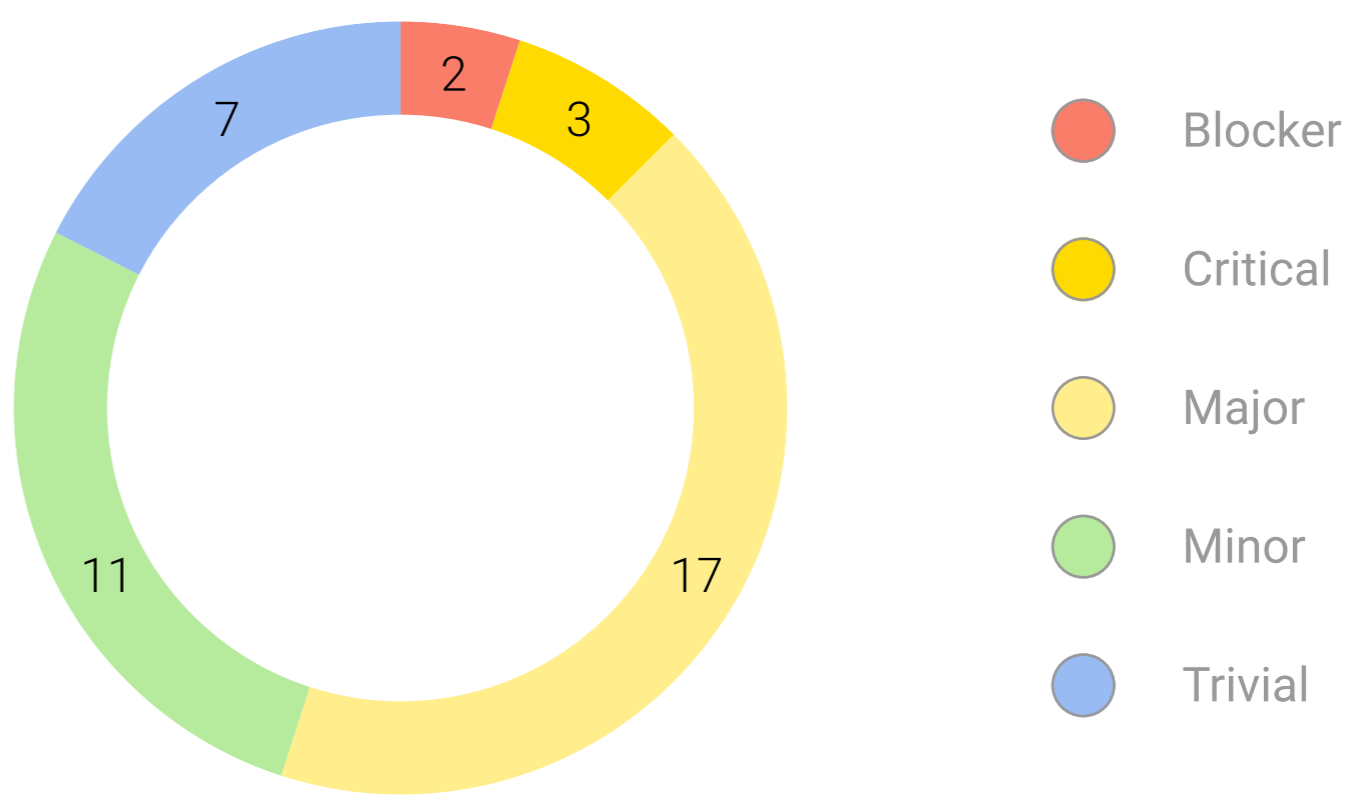

- In the past 14 days:
- 1607 Passed  
66% set to Passed
  - 175 Failed  
7% set to Failed
  - 339 Blocked  
14% set to Blocked
  - 307 Retest  
13% set to Retest

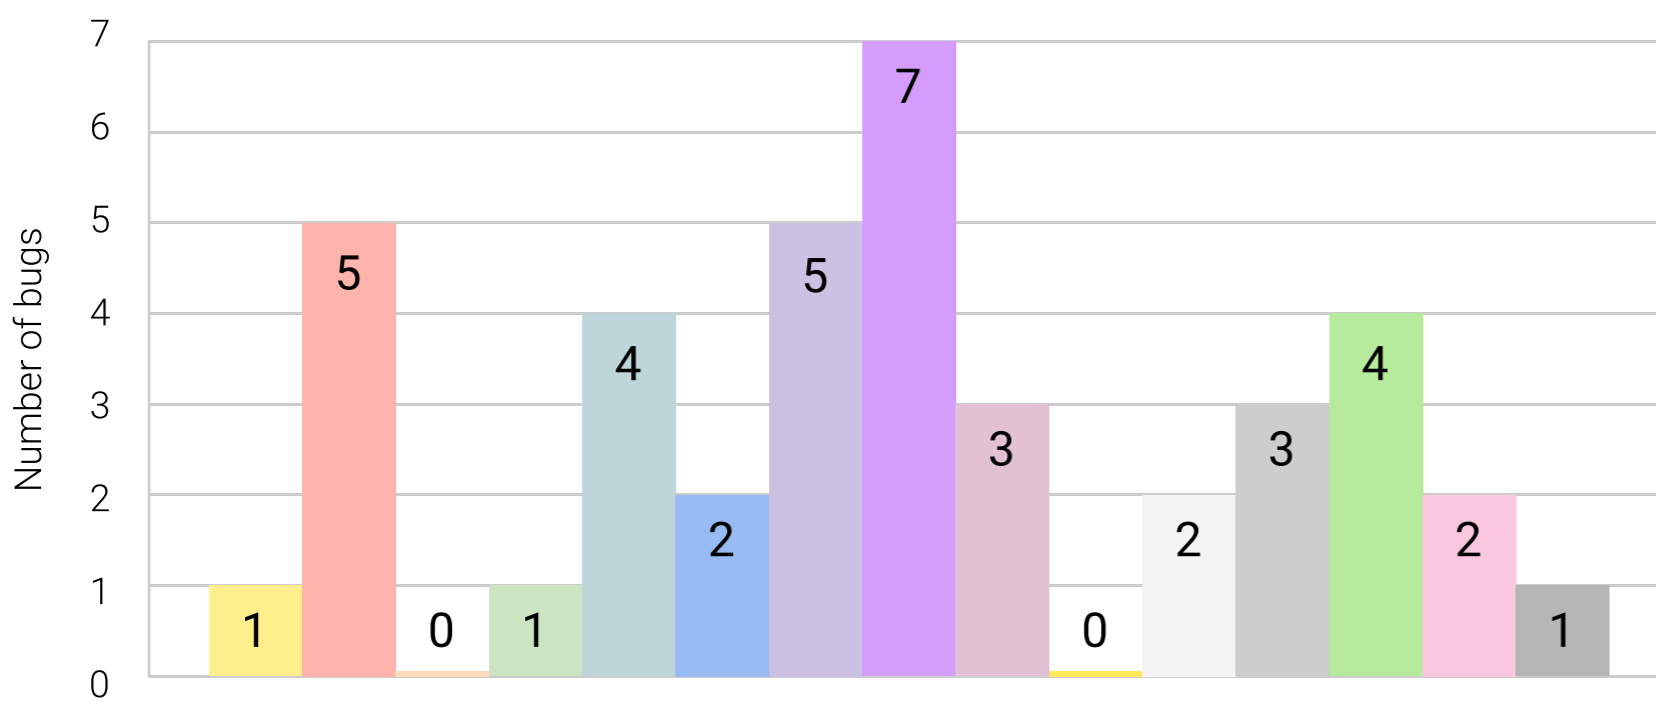

## Application Test coverage

## Defect statistics (by severity)

## Defect statistics (by modules)

- Authorization
- Registration
- Header
- Footer
- Toolbar elements
- "Home" page
- Profile
- Info panel
- Algorithm
- Emails
- Order
- Reports
- "Contacts" page
- Calendar
- Other

## Results of automated testing (Regression testing)

ALLURE REPORT 1/2/2019  
21:47:18 - 21:51:02 (3m 44s)

1671 test cases

99.94%

## Test Result Analysis

**Product Readiness For Release**

According to all statistics, test results, and the number of unfixed bugs, the version does not meet the acceptance criteria and is not ready for release. QA team considers postponing the release for fixing defects and passing the acceptance criteria

**The number of unfixed bugs at the end of the Sprint**

- Blocker - 0
- Critical - 1
- Major - 3
- Minor - 10
- Trivial - 5

**Conclusion**

At the end of the testing cycle product version, 2.5.719 has an unfixed defect ATX-2344. According to this defect, the users can't use the "Registration by phone number" feature so the production can lose potential new clients; Statistics: 27% current clients used "Registration by phone number" functionality for registration.

Recommendation: postpone the release of product version 2.5.719 to fix critical defects, provide defect verification, and smoke testing of the product.
