Certification

AWS Certified Cloud Practitioner, 2020 [Link](#)

Industries

Sales & Marketing, Logistics, Technology, Multimedia, Information Services, Service Sector

Technologies and tools

- PHP, JavaScript
- NodeJS
- ExpressJS, Symfony, Yii2
- MySQL, PostgreSQL, DynamoDB
- Docker, RabbitMQ
- AWS
- HTML, CSS
- PHPUnit
- Git

PROJECTS

OurCNC

Duration: 09.2017 – 11.2019

We developed a car rent mobile app from scratch. The application generates keys that allow users to open their cars via Bluetooth. A user adds a scan of a driving license and ID, the map displays all cars. So a driver can choose a car and promptly rent it. Payment is automatically charged at the end of a trip / use. The app also includes Google Maps, a proprietary navigation system, instant messaging.

Team
16 specialists

Position
Senior Software developer

Responsibilities
- Developing the back-end (REST API for mobile application)
- Writing documentations
- Developing the application architecture

Technologies and tools
- JavaScript, ES6, NodeJS, MySQL, AWS, Git

www.andersenlab.com

4 specialists

Position
Front-end developer

Responsibilities
• Implemented the front-end
• Software architecture and its implementation
• Communicated with the Customer
• Stabilization

Technologies and tools
• JavaScript, React, Redux, Bootstrap, HTML, CSS, Git

Mivoq

We have developed the app "Mivoq". It allows users to make high-quality voice recording: it is enough to read a couple of sentences and the program will clean up the unwanted noise and distortion. With the app baby sleep through the tale narrated in the voice of a parent, even if he is out. With the app a user can set the entry to the car Navigator or to the voice of household appliances, to name his favorite video game. Installing Mivoq for social network, users will be able to send voice messages to their friends without typing text. Convenient functionality allows users to adjust settings, for example, to change the tone of voice and intonation. Mivoq is suitable for business technologies or solutions where users need guidance.

Team
6 specialists

Position
Full-stack developer

Responsibilities
• Created site pages
• Implemented new features
• Implemented the back-end
• Implemented communication with the back-end
• Stabilization
