- Implemented communication with back-end
- Developed tests

Technologies and tools

- Kotlin, Java, RxJava, Leanback, Dagger, MVP

App for telephony provider

Duration: 03.2016 – 04.2017

An application for the Russian leading long-distance telephony provider. In every region of Russia, it acts as a “carriers’ carrier” - interconnecting all local public operators’ networks into a single national network for long-distance service. We’ve developed the system of terminals for sellers with the ability to track sales, payment of various services and goods.
