- Jira, TestRail, iOS, Android, Confluence, Allure, Postman, Swagger, Splunk, AppsFlyer, Chrome DevTools, Figma, Zeplin

OurCnC

We developed a car rent mobile app from scratch. The application generates keys that allow you to open your favorite machine via Bluetooth. A user adds scan of a driving license and ID, the map displays all cars. So a driver can choose a car and promptly rent it. Payment is automatically charged at the end of a trip / use. The app also includes Google Maps, a proprietary navigation system, instant messaging.

Team
8 specialists
